What Is Our Purpose?

A group of young people in Chicago have recently organized the Lithuanian National Junior League of America. The club was organized to stimulate interest in the Lithuanian language, culture, and the country itself. With such doings the Lithuanian youth of America will know the history and people of their parent Fatherhood.

The Chicago group is now making various plans as to the social activities, in which the members will be able to participate in during the fall and winter season.

We are urging all of the young Lithuanians in the United States to start organizing a League of their own in the various cities in which they reside.

When this organization will be spread throughout the country, we will unite our forces and thus achieve greater results for the Lithuanian youth of America.

Why don't you start this organization in your city? Remember, youth organized is youth achieved. — A Member.

DEVELOPING OUR PERSONALITY

By Sally

Today, personality is one of the most discussed topics. It is in demand for every field of work and in all the walks of life.

Beauty, in the by-gone years, was the necessary element for success. A pretty face or a handsome one reaped all the rewards. But in this modern, up-to-date century, good looks or regular features are not essential.

Everyone can and should develop a delightful personality. In one of the leading newspapers, there was a set of rules to be considered in building one's character. The following are a few that have been taken from the paper: Always look at the person to whom you are speaking, your face must express what you are saying, your tone of voice should be pleasing and have variety, your attitude should be neither superior nor inferior.

Doctor Fosdick, in one of his articles, writes that faith and courage, that carries one to the goal in spite of external happenings, is one of the central secrets of success. Imagination, too, he says, plays a large part. The power to visualize the person you'd like to be. Last, common sense is fundamental. The ability to pick a goal possible of achievement.

Now, that the secrets of personality have been observed, are we all going to emerge from our obscurity into geniuses or people of great fame?

Barnett's organized orchestra played well... Mr. Aleksa drank beer... The tall Firant boy danced with Mr. Narvid's daughter, Aldona... Estelle Petkunas was with Leo and the two Als.

There was a little program in which Valarie Slažas, Albina Aleksinas, Eileen Masalskis, and Eddie Oksas participated... Edgar Zimont, with his two charming friends, was observed strolling around the grove. Aldona Vaishville, Anna Petkunas, and Agnes Barnett worked behind the bar... Ann Jakaitis and her charming mother sold 'saldainės' right off the boat... Aldona Gulbin aided her mother in selling chances. Mr. Frank Bulaw was another one of the picnickers with the poet, Arėjas Vitkauskas... Aldona Petrauskas came with her family.

The orchestra made up of a blond called Frenchie, drum player, Dennis, violin player, Helen, the only girl, and a piano and accordion player, Edward, gave us regular Lithuanian and English music in a 'hotcha' style. They'll get there some day.

Ann Nemunas, petite and cute, Teddie Nainis, brown-eyed and gay Richard Platkauskas, still mischievous, Doc, whose name is still unrevealed, and Mr. Vaidyla, all sunburnt, were some of the others, who are always found at Sandara's affairs. It was the last outing and everyone, who came, had a rollicking time. — Sally.

Senoji Lietuvių Tautos Religija

Lietuvių tauta krikštijosi tikėtai keturioliktojo šimtmečio gale. Kaikurios jos šalys, pa-vyzdžiui, žemaičiai, priėmė

krikštą dar vėliau. Anksčiau lietuviai turėjo savo religiją. Kaip tas tvirtino, kad lietuviai garbinę stabus ir buvę stabmeldžiai—pagony. Bet dabar tiniai mokslininkai ištyrė, kad senovėje lietuviai stabų negarbinę. Lietuviai reiškė pagarbą dvasioms ir turėjo vieną Dievą, Praamžiumi vadinamą. Perkunas tebuvo matomas ir girdimas Praamžiaus ženklas. Šiaip senovės lietuviai labai mylėjo gamtą ir laikė ją esant šventa. Saulė, mėnuo, žvaigždės, perkunija, visokie gyviai, miškai, laukai, vandenai buvo šventi. Kai kuris žmogus mirdavo, buvo įsitikinama, kad jis pereiv-

davo gyventi i žuola, beržą arba i kokį kitą gyvį bei žmogų. Lietuviai laikė šventoje pa garboje ugnį, ir viskas, kas pereinavo per ugnį, buvo šventa bei garbinga. Senovėje mūsų tauta turėjo savo kunigus, savo šventoves, savo šventuosius kalnus bei stebuklingąsias pakalnes.
